

Auto Copper Clad Laminate Packing Machine WS-8300

Product Image:

QR Code:

Features :

1. Auto Copper Clad Laminate Packing Machine is designed for the largest laminated package, which is too heavy to carry also hard to pack, so this machine is displaced manual working. This machine can be manufactured into automatically networking system, which including in auto in-feeding, separating, weighing, packing, piling, labeling, and warehousing...etc., all be automatically. This machine has height stability which can promote the productivity of working.

Use :

1. This machine is suitable with copper clad laminate which is made by CCL and PCB factories.
2. Packing Material: Kraft paper with PE. $\varphi 500 \times 1370W$ / Roll

Specifications: (Unit: m/m)

Model	Mechanical Dimension (LxWxH)	Packing Area (Wx L)	Electrical Heating	Capacity	Seal Mode	Should Use Air Compressor	Power Supply
WS-8300	4190 x 1500 x 2000	510~1300 W x 1000~1300 L	3.7 KW	2-3 packs / min	Four Side Seal	5HP	380V.3 Ø As specified.

•We can also accept your order if your requirement is beyond our standard specification.
